WE HELP PEOPLE OVERCOME.

HOPE NETWORK
FOR OVER 50 YEARS, WE’VE BEEN SOLVING A PROBLEM THAT’S ALL AROUND US.

More than 60 million people in the U.S. suffer from physical, mental, or social barriers that impact how they live. The majority have fallen through the cracks and aren’t receiving the care they deserve.

At Hope Network, we are advocates for these people – by providing services that give them a better chance to overcome life’s challenges. The result is fulfillment through independence, progress, and community integration. Whether it’s someone recovering from a brain injury, a child growing up with autism, or someone living with a mental illness, we have countless stories of restoration to tell.

HERE’S HOW WE MAKE HOPE POSSIBLE.

Overcoming looks a little different for each person we serve. That’s why the services we offer are so deep and broad. But more important than what we do is why we do it. We believe each person deserves a rewarding, fulfilling life. That’s why, instead of taking a one-size-fits-all approach, we look at each individual – no matter the injury, diagnosis, or situation they have to overcome.

WITH OVER 240 LOCATIONS AND 2,800 STAFF MEMBERS, WE SERVE MORE THAN 23,000 PEOPLE ANNUALLY THROUGHOUT MICHIGAN.

It’s who we are. It’s what we do.

Because we have a belief that every person, created by God, can be more.

Can do more.

Can go further than anyone ever imagined.

This is what Hope looks like.
GUTSY. DRAMATIC. BRAVE. THESE ARE WHAT COMEBACKS ARE. THIS IS WHERE THEY HAPPEN.

Life can change in an instant. A brain or spinal cord injury can make the simple things in life seem far away. That’s why we’re firmly dedicated to helping people make a comeback. For over 30 years, Hope Network Neuro Rehabilitation has helped people with traumatic brain injuries, spinal cord injuries, and other neurologic conditions re-establish purposeful participation at work or home, and return to the leisure activities they enjoyed prior to their injury.

It was a terrible car crash. Doctors expected Emily to be paralyzed, her injuries were so serious. Among them, a severe brain injury that left her dependent on a wheelchair, struggling to talk, and forced to relearn the simplest tasks. A recovery seemed insurmountable. But Emily pushed her body to the limit and never gave up. Today, she’s living her comeback story. “I have the old me back!”

EMILY’S STORY Watch at hopenetworkrehab.org/emily

Post-Acute Transitional Rehabilitation
Intensive neuro rehabilitation program where people aim to participate in 25 to 30 hours of therapy per week. Therapy is focused on relearning the skills necessary for people to return to a productive lifestyle at home, work, and in the community.

Neurobehavioral Rehabilitation
For those who experience uncharacteristic aggression, prolonged confusion, or an escalation of behavioral issues following a brain injury.

Day Rehab and Outpatient Therapy
Full-day, half-day, or single-service programs for people who need specialized neuro rehabilitation, but do not require an inpatient program.

Physician Services and Medical Care Coordination
Offered because a person’s needs may not be limited to their rehabilitation goals alone.

Residential and Community Support
Allows people to live as independently as possible in community settings through full-time assistance or part-time support.

Specialty Services
Integrate with a patient’s plan, including pre-driver assessments, aquatic therapy, and more.

Therapeutic Recreation
Includes therapeutic services that incorporate an individual’s interests and goals.

Return to Work Rehabilitation
Prepares people with assessments, on-the-job coaching, and training so they can be ready for employment.

AUTISM

CHANGING THE WORLD FOR CHILDREN WITH AUTISM.

Autism Spectrum Disorders occur in 1 of every 68 children. At Hope Network’s Center for Autism, we give every child a chance for a healthy, productive life. Through early intervention and comprehensive outpatient treatment services like Applied Behavior Analysis (ABA), we see results in children with autism that were not believed possible 10 years ago. Our clinical team develops a personalized treatment plan for each child to maximize outcomes.

Neuropsychological/Psychological Evaluation
Provides assessments for children who may be exhibiting academic, developmental, or emotional struggles.

Applied Behavior Analysis (ABA)
Involves highly structured, skill-oriented activities so children with autism can function in their daily lives.

MAX’S STORY Watch at hopenetwork.org/max

For the first year of his life, Max followed the milestones of a normal baby. Then he regressed, words were replaced with crying and tantrums, and he was diagnosed with severe autism. Recognizing the importance of early intervention and therapy, his mom made the bold choice to move their family from Indiana to Michigan so Max could go to Hope Network’s Center for Autism. That decision changed Max’s life. Instead of depending on special education and living in a group home as an adult, Max will have the same choices as other children. The choice to go to college, have a job, and a family. Fortunately for Max, hope was just within reach.
REReducing the devastating effects of mental illness.

This year alone, one in five people will experience a mental illness. That’s a statistic that touches all of us. We believe that ensuring mental health is as critical as our physical health, that’s why we serve more than 9,000 people with a broad continuum of care.

From crisis to community-based living, we treat mental illness, complex care needs, co-occurring disorders, and other related conditions. We focus on teaching and bringing about change, rather than simply “managing” behaviors. By emphasizing an individual’s unique abilities, not disabilities, we help them assume control over their own lives and reach their highest potential.

Bernie’s Story

Watch at hopenetwork.org/bernie

When Bernie left the psychiatric institution where he lived for 30 years, the staff said he’d never make it on the outside. But he’s never looked back since arriving at Hope Network’s River Valley campus. It’s home for people with mental illness like Bernie, where they can roam throughout the building and backyard, and participate in regular exercise, music class, and community outings. Bernie has a mental illness. But at Hope Network, he also has hope. And there’s nothing more important than that.

Residential Services
Offers personal care and community living in a safe and supportive setting.

Specialized Residential Treatment
Provides a spectrum of choices from lower intensity to highly intensive residential treatment, as well as semi-independent and community living.

Crisis Residential Treatment
Short-term alternative to inpatient psychiatric hospitalization.

Outpatient Services
Includes practical treatment approaches that address each person’s unique needs and abilities.

Adult Day Services
Serves older adults with age-onset disabilities, such as dementia, Alzheimer’s, or other cognitive impairments, through daily enrichment activities.

Assertive Community Treatment (ACT)
Assists outpatient consumers whose symptoms of mental illness result in interruptions with their daily lives.

Mobile Crisis Stabilization/Screening and Assessment
Stabilizes acute symptoms of mental illness, substance abuse, domestic violence, or emotional distress.

Integrated Dual Diagnosis Treatment (IDDT)
Combines substance abuse services with mental health services.

Clubhouse
Provides community access and inclusion, plus volunteer opportunities that offer a way to give back to the community.

Supported Employment
Assists individuals in obtaining successful community employment.
BREAKING DOWN BARRIERS FOR THOSE WITH DISABILITIES.

The services we provide to individuals with developmental disabilities represent the roots of where Hope Network began. Today, over 50 years later, we’ve evolved those services to introduce individuals into the community, help them practice and acquire new skills, and experience life outside of a secluded setting.

**Residential Services**
Provides a home-like environment to promote community living and community involvement – 24/7.

**Specialty Residential Services**
Includes short-term accommodation at the Gilead Crisis Home, as well as unique programs for people living with Prader-Willi syndrome.

**Vocational Services**
Offers individuals the opportunity to learn vocational skills and participate in supported employment.
SUPPORT—WHEREVER, WHENEVER, AND HOWEVER IT’S NEEDED.

Those we serve often live in a community that wasn’t designed for people with disabilities or facing socio-economic disadvantages. That’s why we offer comprehensive support services to work in conjunction with one of our specialized care services, or as a stand-alone option, depending on the individual’s needs.

Whether it’s a place to live, a place to work, or a ride to an appointment, we’re here and ready to serve. We continue to help individuals achieve their wants, meet their needs, and maximize their potential for greater independence.

**Housing**
Our subsidized housing services provide income-based apartment and townhouse rentals that are safe, comfortable, and affordable.

**Supported Independent Living**
Individuals who desire more independent community living options – yet still need help with basic needs such as meal preparation, laundry, or nursing – can receive supports in a variety of locations across West Michigan.

**Michigan Education Corps**
Over 45,000 Michigan students are failing to reach basic levels of literacy. We’re here to change that. Michigan Education Corps works with students age three through grade three, ensuring each one has a chance to succeed. To get children back on track, we partner with AmeriCorps members who provide students in our program tutoring in their own school, five days per week, over the course of the school year. We isolate each child’s challenges and create a tutoring schedule to help them catch up to their peers.

**Transportation**
We provide accessible, cost-effective options for people in need of transportation services across Michigan, and manage a specialized transportation fleet in Kent County. If you see a bus with the message "We Help People Overcome," that’s us.

**Workforce Development**
We believe that through employment, individuals can achieve meaning and identity, and establish their place as a contributing member of their community. Hope Network Workforce Development serves those with disabilities, disadvantages, or other barriers to employment by providing specialized training and evaluation, job placement, and ongoing supports.

**Care Coordination**
We offer a full range of care and services including psychiatric, nursing, and behavioral supports. We also provide assistance with housing, obtaining benefits, coordinating medical care, facilitating vocational supports, and fulfilling other needs.
WE HELP PEOPLE OVERCOME. AND TO DO THAT, WE NEED YOU.

If you believe in our mission to help people overcome, there are many ways to get involved.

PARTNER
We’re always looking to collaborate with like-minded partners to make good things happen. If you’re in the business of helping people, building stronger communities, and making Michigan’s economy better, we should talk.

WORK
Hope takes a team—one behind the mission of helping people overcome. From Physical Therapists, to Finance, to Direct Support Professionals, we’re always looking for the best and the brightest. After all, helping thousands of people across the state doesn’t just happen on its own. Visit hopenetwork.org/jobs to learn more.

FOLLOW
Like our Facebook page for updates, event information, and more. It’s a simple way to support and spread our mission—with the click of a button. Visit facebook.com/hopenetwork.

GIVE
There are plenty of ways to do it. Donate. Attend an event. Or volunteer. It all goes toward what we’re all about—helping people overcome. Learn more at hopenetwork.org/give.

WE BELIEVE IN HOPE.

We believe it can inspire, spark the first steps of recovery, be an advocate, lead to groundbreaking approaches, and motivate people in incredible ways. If you have nothing, but you have hope, you have everything.

So join us. Be part of a mission that takes on the challenges, the barriers, the statistics, the seemingly impossible. Help us overcome them all.
WHERE SOME SEE BARRIERS, WE SEE THE OPPORTUNITY TO OVERCOME.
