### Residential/staffing COVID-19 protocols

#### **Decision tree for any employee coming in:**

1. Employee comes in stating someone they know is getting tested or exposed.
  - Employee should self-monitor for symptoms (listed in screening tool). Employee can still come to work, but self-monitor symptoms and keep filling form out.
2. If potential contact comes back positive:
  - Then employee answers yes to question #3 on screening tool, employee must stay home.
3. If employee becomes yes to #3, but does not have COVID-19 him or herself then rest of employees that have come into contact should continue to self-monitor per questionnaire.
4. If employee becomes COVID-19 positive, then service lines triage which staff should stay home and stay at work based on level of symptoms with least symptomatic staff coming to staff first. When we get to a higher phase, eliminate all screening questions except for #1.
5. If patient and/or employee is COVID-19 positive, PPE, alternatives and isolation protocols will be used per CDC guidelines (link here: <https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/prevent-spread-in-long-term-care-facilities.html#cases-in-facility> )
  - Reuse PPE and possible extended use of N-95 masks per CDC guidelines
6. Transportation for patients who are COVID-19 positive:
  - Service line will isolate person and use appropriate PPE or PPE available per CDC guidelines, contact medical transportation, wait for information from central location, continue precautions.
